Systems slides: [Valentin Fiala_Systems and Ethics_BOKU_Austria](#)

Leading questions

The ethical question: How we understand a food system in line with an ethical foundation (IFOAM Principles / Sustainable Development Goals (SDG) / seven attributes / Fair Trade etc.)?

The systems theoretical question: How systems theory can help us to better understand the social, economic, cultural, and ecological complexity of food systems in practice?

The practical question: How to implement, institutionalize and maintain an organic food system approach, i.e. to transform / up scale the current to an organic food system?

Photosynthesis /
Nitrogen fixation
